

# Detectamet Metal Detectable **Disposable Nitrile Gloves**

**2.5 million  
units sold  
in 2023!**

*"a tighter fitting glove that makes it  
feel like you're not wearing them.  
They don't make your hands sweat.  
All in all a better glove...."*

Made from a metal detectable nitrile material manufactured under a patent-protected process, these gloves are significantly more durable and tear-resistant than other detectable disposable gloves on the market, making them perfect for food handling requirements.

Available in 3 sizes, these gloves are latex-free, powder-free and food contact approved under EU & FFDCA regulations.
